

A General Look at Human Pheromones

Love has always intrigued many people and has most people baffled. Why you are attracted to certain people have a lot to do with the **human pheromones** that exist in just about every living thing on the planet.

Without these chemicals and elements released by the human body, a life long mate would be even more difficult to locate than it is right now. There have been many studies on human nature and certain behaviors who have revealed that **pheromones** are the main cause of why we are drawn to someone, especially sexually.

Men and women have different pheromones and men are said to release most of theirs if they sweat. Both male and **female pheromones** are usually picked up through the olfactory senses of the opposite sex; however, there are studies that show that some of these sensory tend to be more sensitive to the pheromones of the same sex.

- Perfumes and colognes are created with this type of reaction to happen by when wearing it.
- Many perfumes created for girls may attract the attention of men, mainly because of the ingredients used in them.

“

***Pheromones - separating the scams, myths and realities** Pheromones - separating the myths as well as realities. Have pheromones peaked your curiosity and you're willing to attempt them away, but you are confused and skeptical on the mindboggling number of companies and also websites selling pheromones...*

The insect and animal kingdom rely more on pheromones than people. Human pheromones are mainly used for fascination, while insects rely on the excreted chemicals for survival. They could use them in order to warn the swarm of predators and can alert the opposite sex of readiness to mate. Without these kinds of very important excretions, survival of most insects would soon disappear.

The Animal World, They are Used for Just about the Same Reason They are in Humans

Attracting a breeding mate that will ensure the survival of species, including in human beings. With a variety of species of animals, the pheromones are mixed with bright colors and crazy behaviors all in the name of attracting a partner.

- To find out more about pheromones and perfumes, do a little research on line.
- More than likely right now, you are secreting pheromones or wearing cologne that has it in it.
