

## Andro 42: Pheromones And Increased Attractiveness

Who would have thought that the reason why some men and women attract other women and men more than the rest had something to do with certain chemicals called pheromones that our entire body releases. These chemicals are something that we release through the skin and the larger the amount we release the more sexually attractive we appear. It is because once we release the pheromones they travel undetected through the nose of our 'could be' partner and trigger in their mind a subconscious feeling that translates into increased sexual responses.

### This Determines How Attractive You are to Your 'Could be' Partner

Your clothes, cologne and looks maybe important but they are secondary when compared to these chemicals. This is what explains those off days and nights when practically nothing seems to be going right and those other days when you seem to hit a bit of a lean patch. It all has to do with the amount of this chemical you're releasing through your skin.

### What It Means for You

Science is very capable of working like miracles, and ever since the function of these human pheromones came to light, the obvious question sprang up. Can humans control them? Well, the answer is yes. If your body is not releasing a sufficient amount of these chemicals, why not put some of them on. Consequently, the advent of the pheromone cologne came to be, or the pheromone perfume in the case of women. These hybrid perfumes and colognes have human pheromones in their composition.

They themselves do not have any feature or noticeable smell that other people may find out, it just remains on your body like a secret weapon urging you on and helping you too. If you do not want the particular cologne or perfume these pheromones come along with, you need not worry. You can get hold of just a simple bottle containing these chemicals, which you can mix or apply in addition to any cologne or perfume. They are different in the case of men who want to attract women and women who want to attract men. Some companies have even come out with the option for gay men and lesbian women, if they want to use them as well.

- Some of the most popular fragrances for men're warm seasoning and woods; for women, it is the sweeter seasoning and flowered essences.
- Men's cologne, then, is normally more musky and also robust.
- Women's fragrance is lighter as well as delicate.
- Manly scents might include chilies, citrus fruits, and dark woods like walnut or cherry, the mix of which conjure up rich, earthy ringtones.
- Feminine scents might consist of vanilla flavor, chocolate, lavender, as well as other more gratifying, much more delicious aromas.
